### **Executive Summary**

The University of New Brunswick, with campuses in Fredericton and Saint John, is the largest university in New Brunswick and plays a vital role in the creation and dissemination of knowledge to stakeholders in government, industry, the non-profit sector and the population at large. As one of the first Research Data Centres opened in Canada, the UNB-RDC is central to the creation and dissemination of social policy research by members of the Canadian Research Institute for Social Policy (CRISP), the faculty of Nursing, the Department of Economics, the Department of Sociology, and other departments across the university.

The presence of the RDC and the opportunities available to researchers and policymakers continue to be instrumental in an ongoing initiative to develop connections among UNB faculty, graduate students, provincial government employees and NGOs that will benefit both the University and the wider community. With the increasing slate of administrative health data, the RDC and the soon to be opened NB Institute for Research, Data and Training that will host provincial administrative data will offer an extensive data platform to support policy relevant research in New Brunswick. The RDC also continues its partnership with the NB Social Policy Research Network and uses the extensive NB-SPRN network to connect government and NGOs with academic researchers and graduate students.

In October 2012, UNB hosted the annual Canadian Research Data Centre conference. The conference featured keynotes, a closing panel on administrative health data, 35 presentations, poster sessions and a lunchtime session where graduate students gave short verbal presentations of their research. Financial support came from the CRDCN, a SSHRC connection grant and a variety of other sources.

In 2012 significant progress was made towards the reopening of the Moncton branch and the opening of a new branch RDC at Memorial University in St. John's Newfoundland. Both branch RDCs will be open by the summer of 2013.

The UNB-RDC activity levels in 2012 were significantly higher than in 2011, reflecting increased activity arising from an ongoing collaboration between Dr. Michael Haan (CRC in Social Policy) and the NB Department of Postsecondary Education Training and Labour. Contracts involving graduate students continued to constitute a significant part of our total activity.

	Contracts Started	Contracts Completed	Contracts Withdrawn
2012	12	4	0

#### Instructions:

The source for the information in this table is the Program Manager's Report which will be sent to each Centre by Statistics Canada by the end of March of each year.

#### Definitions

- Started:** The count of all the contracts started during the calendar year  
**Completed:** The number of contracts that met their contractual obligations  
**Withdrawn:** The number of contracts that were withdrawn at the request of the principle investigator

### Instructions:

Source of line 1 (completed projects) is the Program Manager (PM) report.

Source of # of publications (lines 2-9) is the CRDCN Researchers' Questionnaire, supplied as conditional results in mid-May, **plus** non-duplicate results for the Annual Report year from the CRDCN Bibliography (<http://rdc-cdr.ca/statistics>) before mid-June, **plus** any publications obtained by the RDC outside of either. By mid-June, publications will be edited, corrected and completed and made available in the CRDCN Bibliography.

Source of lines 10 and 11 (graduate courses) are from the RDC.

Source of line 12 (conference presentations) is the CRDCN Researchers' Questionnaire, supplied in mid-May.

Source of lines 13 and 14 (conference organization, conference sessions, etc.) is the RDC.

**Box 2a: Summary of Substantive Comments on Publications**

Output has increased modestly from 2012 and should increase more significantly going forward to reflect the continued increase in activity through 2012 and into 2013.

Instructions: Source of information is the CRDCN Researchers' Questionnaire.

**Box 2b: Summary of Major Media Coverage of Research**

Professor Mike Haan, Canada Research Chair in Social Policy at UNB, continued to do extensive interviews across the full media spectrum, from television and radio interviews to public lectures and invited talks to Government, NGOs and the private sector in New Brunswick. The main theme of these interactions was New Brunswick's looming demographic crisis as the population ages and migration both from North to South and out of the province continues.

Instructions: Source of information is the CRDCN Researchers' Questionnaire.

**Box 3: Substantive Comments and Summary of Training within the RDC**

Training at the NB-RDC has occurred in a variety of forms and forums. Information sessions for government and NGOs about the RDC’s data holdings continued in 2012, and a number of more technical data sessions were given in the Departments of Economics and Sociology. A summer training course outside of the RDC was conducted in the summer of 2012 for government employees and it is hoped this will lead to more specialized courses within the RDC.

Numbers of Masters and Ph.D. graduate students using the RDC continued to increase, reflecting the expanding research programs of Drs. Haan and McDonald and their increasing ties with the government of New Brunswick.

### Box 5a: Substantive Comments on Knowledge Mobilization Activities within the RDC

Most of our knowledge mobilization activities were aimed at developing the foundation for future government/NGO/academic collaborations through information sessions on RDC data holdings, how to access RDC data, and the type of policy-relevant research possible with RDC data.

Other knowledge mobilization involved a series of public lectures, media interviews and stakeholder consultations involving Professor Michael Haan, Canada Research Chair in Social Policy at UNB-Fredericton.

#### Vignette 1

##### *Example of vignette: **Head and Neck Cancer in Canada***

Head and neck cancers (HNC) account for approximately 3 percent of all cancers in the United States and Canada. Over the past two decades, a dramatic increase in the incidence of cancer at some head and neck subsites, particularly oropharynx, has been observed in the US and other countries. At the same time, anecdotal evidence indicated relatively more patients diagnosed mainly with oropharyngeal cancer have been younger, female, and non-smokers. These changes are believed to be related to the increase in the number of certain types of head and neck cancers caused by human papilloma virus (HPV).

In collaboration with Drs. Martin Corsten and Stephanie Johnson-Obaseki of the Ottawa Hospital, Dr. Ted McDonald has used health administrative data available through the RDC to develop an extensive research program to identify and evaluate the socioeconomic and demographic determinants of HNC with the objective of helping to explain the observed changes in the incidence and etiology of the disease. This research program is the first Canadian study to use nationwide Cancer Registry data to examine the changes in the incidence of various forms of HNC over time, with a particular focus on the role of socioeconomic status and its effect on incidence and survival.

This research collaboration has led to publications in highly ranked journals and presentations at national and international conferences, and is making a significant contribution to an area of increasingly intense interest in the medical oncological and public health communities. The work to date is also laying the groundwork for a funding application that will lead to a significant expansion in the scope of the research program to consider the incidence of oral HPV in the broader community and how it varies over time, by region and by socioeconomic status.

Instructions: Provide an example of research mobilization in the RDC.

**Criterion 7: Summary of Major Achievements and Challenges for the past year**

- Coordinating efforts to reopen the Branch RDC at the Université de Moncton and the establishment of a new Branch RDC at Memorial University of Newfoundland and Labrador.
- Raising awareness among government, NGO and business leaders about the availability of the RDC and the possibilities for collaboration and partnership
- Increasing activity, particularly from graduate students and through the NB-SPRN, and renewed partnership with NB-SPRN
- The 2012 CRDCN National Conference

---

- Operating on reduced hours and without a statistical analyst for half of 2012
- Stable funding

**Criterion 8: Major Objectives and foreseeable Challenges for next year**

- Opening of the NB Institute for Data, Research and Training as a repository for provincial administrative data. Together with the RDC (both of which are located on the 3<sup>rd</sup> floor of Keirstead Hall), these facilities will provide a 'one-stop shop' for research relevant to New Brunswick
- Supporting Moncton and Memorial branches as they commence regular operations
- Continuing to increase the number and breadth of researchers using the RDC
- Approval of our application for a CIHR Canada Research Chair in the spatial determinants of health

---

- Stable funding
- Declining faculty complement in key departments due to UNB budget cuts
